Date	31 January 2026
Team ID	
Project Name	Global Fuel Prices and Taxation Analysis (2020–2026)
Maximum Marks	4 Marks

Ideation Phase
Brainstorm & Idea Prioritization Template

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S. No	Team Member	Idea / Suggestion	Category	Group No.
1	Team Member 1	Build interactive tax heatmaps, assess fuel subsidy impacts across regions, and evaluate the relationship between government tax percentages and retail fuel prices.	Policy & Governance	1
2	Team Member 2	Track retail price trends for Petrol and Diesel, perform price forecasting, map global diesel distribution, and calculate regional price volatility.	Supply Chain & Volatility	2
3	Team Member 3	Analyze retail fuel prices across income-level classifications, build cross-tabulations of subsidies, and evaluate Brent crude oil price pass-through/correlation.	Energy Economics	3
4	Team Member 4	Compare price structures and tax burdens across Petrol, Diesel, and LPG, while evaluating regional environmental tax policy mechanisms.	Multi-Fuel Economics	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Med/Low)	Importance (High/Med/Low)	Priority	Selected (Yes/No)
1	**Policy Dashboard:** Tax heatmaps, net tax/subsidy impact visualizations, and percentage-based price structural analysis across 84 countries.	High	High	1	Yes
2	**Supply Chain & Volatility Analysis:** Multi-fuel price trend dashboards, geographical diesel maps, volatility index tracking, and predictive forecasting.	High	High	2	Yes
3	**Macroeconomic & Research View:** Income group segmentation, subsidy distribution cross-tabs, and Brent crude spot price vs. retail price correlation modeling.	High	High	3	Yes
